OUR MISSION

We have one goal, attaining perfection. Our teams focus on evolving and progressing from every product and every service we deliver. We are a firm believer that perfection is a result of change. Innovation is a discipline that guides our change, culture and business strategy.

cloudInAJar™
is a JarWare proprietary
product | architected to
be cloud vendor agnostic
| patent-pending

FEATURES

AUTOMATION

It's built from the ground up to intelligently replace initial DevSecOps teams and increase time-to-market for any modernization effort.

OPEN ARCHITECTURE

It's built on 100% proven Open-Source technologies. Kubernetes, Docker, Origins, SpringBoot, Jenkins, Git, Maven, Gradle, Tomcat, Node.js, JUnit, Mockito, Ansible, and more.

OUT OF THE BOX

Nearly Zero-Code. 30 encapsulated stack based playbooks ready to work for you OOTB. These playbooks will stand-up a Kubernetes cluster with a fully baked-in CI/CD pipeline without writing a single line of code. Time to market increase by 800%. Saves YOU money.
